### Do You Want to Buy a Snowman?

For 2-4 players. Each player needs 10 markers/chips of one color (each different)

Directions:

Shuffle cards and place face down in a pile. Player 1 picks a card, adds the coins, and covers the snowman with the matching price tag with his chip. Player 2 does the same. If a player picks a card with the same amount of a snowman with a chip, that player may “bump” the first chip off and place his chip on that snowman. If a player gets two chips on the same snowman, that snowman is SOLD! No player can take that snowman away. The winner is the first player to use all ten chips.
